

GHobalScan

Accurate, Fast, Simple

GlobalScan is equipped with a small laser scanner that guarantees extremely fast and accurate measurement.

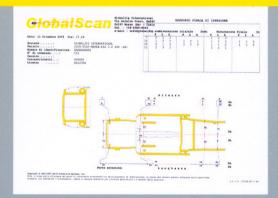

The GlobalScan targets, fit with magnetic quick locks that speed up and facilitate the set up process, make it possible to effectively perform 3-dimensional measurement of all vehicle points.

GlobalScan provides a graphic display of each vehicle, allowing the operator to compare the actual measurements with the precise vehicle specifications. Moreover, measuring several points in real time, it provides continuous updates during the course of the entire repair process.

Continuous, automatic measurements

GLOBALSCAN CERTIFICATION

Fit with the most modern, easy-to-use, intuitive software GlobalScan uses the vehicle's exclusive specifications, ensuring highly precise measurements.

The system provides three different analysis data sheets making it possible to compare the measurements before, during and after repairs, thus certifying quality.
